Not illustrated. 1894 Excerpt: . . . in tons, for Australasia and for each of the separate colonies is next given, for the ten years which ended with 1892. New Zealand, it will be seen, shows a considerably larger return per acre than any of the other provinces: --Only three of the colonies are in a position to export potatoes in any quantity-- Tasmania, New Zealand, and Victoria. The apparent excess in the case of South Australia arises chiefly from re-exports. The surplus in Victoria, though at one time considerable, has now very much decreased. VALUE OF POTATO CHOP. 207 The following were the imports and exports of potatoes: --The total value of the potato crop and the average return per acre for 1892-3, in the Australasian Colonies, will be found below: --HAY. Considerable quantities of wheat, oats, and barley are grown for the purpose of being converted into hay. This crop in point of value is second in importance of the agricultural production. The area under 208 ABEA AND PRODUCTION OF HAY. crop for hay has since 1881 steadily and largely increased, as will be seen from the table herewith. The average production of hay per acre for each colony will be found in the next table, the period embraced by the average being the ten years which closed with 1892: --VALUE OF HAT CROP. 209 The greater portion of the hay is made from wheat, though large quantities of oaten and lucerne hay are produced in Victoria, New South Wales, and New...
