

Planning Beyond Tactics: Towards a Military Application of the Philosophy of Design in the Formulation of Strategy (Paperback)

By Maj Rhg/D British Army Hayward

Createspace Independent Publishing Platform, United States, 2012. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.The recognition of the failure at the strategic and operational levels of war during the Global War on Terror, specifically in Iraq, has resulted in a quest for intellectual solutions to complex operational and strategic problems. To date this has resulted in a tacit acknowledgement that the Military Decision Making Process (MDMP) is not equipped to tackle ill defined problems and that a complementary approach is required. The emphasis on problem framing as defining a problem has been the hallmark of this new approach that is facilitated through institutional learning and a process of reframing rather than the advocating of predictive solutions. This monograph does not attempt to evaluate these new processes or seek to incorporate them within existing doctrine. Instead, it sets out the philosophy behind a design approach to planning. The broad design theory is an amalgam of the Israeli concept of Systemic Operational Design (SOD), Effects-Based Approach (EBA) and Systems of Systems Analysis (SoSA) as a systemic design process that is complementary to existing decision making tools. The monograph elucidates the philosophical...
