Date :2008-01-01 version 1. This book is calculus, linear algebra and random mathematics (probability theory and mathematical statistics) supporting curriculum-based program of experimental teaching materials. Mathematica includes basic knowledge, basic math test, openness and self-test experiments. This book seeks to demonstrate through examples and exercises in mathematical experiments the source of richness, breadth of application of mathematics, mathematical methods of diversity and practicality of mathematical techniques, so that students at the university first and second grade will be able to master the mathematical modeling of experimental and mathematical basic knowledge for future study and application of mathematics to lay the foundation. Book for colleges and universities and other non-science majors use math class, combining the experimental teaching program can also be independent as a math lab course materials. Contents: Chapter Calculus Experiment 1.1 unary function mapping exercises an experimental 1.2 series limits and function limits exercise two experiments 1.3 functions of one variable differential calculus exercises three experiments 1.4 functions of one variable calculus exercises four experiments 1.5 Differential Equations and Differential Equations practice five experiments 1.6 quadric graphical exercises six experiments more than 1.7 yuan function differential calculus exercises seven experiments over 1.8 yuan function calculus exercises to practice eight experimental series nine Chapter 1.9 linear matrix algebra Experiment 2.1 exercises with the basic operations of an experimental 2.2 matrix Exercise 2 determinant and inverse matrix of elementary transformation experiments 2.3 vector set of linear correlation with exercise three experiments 2.4 Solving linear algebraic equations of the general solution to practice four experiments 2.5 eigenvalues, eigenvectors and diagonalization similar exercise five Probability and Statistics Chapter Experiment 3.1 to practice the basics...
